

Grease with molybdenum disulfide

The grease reduces friction of metal parts to a minimum. Provides long lasting protection against rinsing and abrasion. It perfectly protects elements of the suspension systems, steering systems, and any moving parts of the chassis.

Physicochemical properties	
State of matter	gas
Color	black
Odor	characteristic
Density at 20 °C	-0,95 g/cm ³
Release of oil from grease at 100 °C within 24 hours	< 5 %
Penetration at 25 °C after kneading	260-300 mm/10
Penetration at temp. -30 °C	> 150 °C
Contents MoS ₂	3 %
Drop point	> 180 °C
Operating temperature	-30 °C to 130 °C
Solubility in water	does not dissolve in water

Application:

- lubrication of all moving parts in mechanical and industrial vehicles operating in a humid environment (e.g. cranes, forklifts, jib cranes, hoists etc.).

Packagings:

Volume	Type of packaging	Collective packaging	Item Code
100 ml	aerosol	4/20	ART.AGT-152
400 ml	aerosol	4/12	ART.AGT-174

Warehousing:

Store in sealed containers in dry and well ventilated areas away from sources of heat and ignition and direct sunlight. Do not expose to temperatures exceeding 50 °C/122 °F.
