	SAFE	TY DATA SHEET
	according to Commis	sion Regulation (EU) 2020/878 as amended
	Rozpusz	czalnik do lakieru PVB
	on date 20th February 2023	
Revisi	on date	Version 4.0
SECT	ION 1: Identification of the substance/mi	ixture and of the company/undertaking
1.1.	Product identifier	Rozpuszczalnik do lakieru PVB
	Substance / mixture	mixture
	UFI	JF30-60K4-600V-99JV
1.2.	Relevant identified uses of the substan	ce or mixture and uses advised against
	Mixture's intended use	
	Solvent.	
	Main intended use	
	d extraction agents	
	Mixture uses advised against	
	The product should not be used in ways oth	er than those referred in Section 1.
1.3.	Details of the supplier of the safety dat	a sheet
	Manufacturer	
	Name or trade name	AG TermoPasty Grzegorz Gąsowski
	Address	Kolejowa 33 E, Sokoły, 18-218
		Poland
	Identification number (CRN)	200133730
	VAT Reg No	PL9661767714
	Phone	862741342
	E-mail	biuro@termopasty.pl
	Web address	www.termopasty.pl
	Competent person responsible for the s	safety data sheet
	Name	AG TermoPasty Grzegorz Gąsowski
	E-mail	biuro@termopasty.pl
1.4.	Emergency telephone number	
	European emergency number: 112	

# **SECTION 2: Hazards identification**

### 2.1. Classification of the substance or mixture

Classification of the mixture in accordance with Regulation (EC) No 1272/2008 The mixture is classified as dangerous.

Flam. Liq. 2, H225 Skin Irrit. 2, H315 Eye Dam. 1, H318 STOT SE 3, H336

Full text of all classifications and hazard statements is given in the section 16.

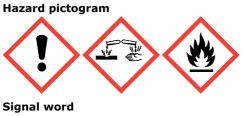

## Most serious adverse physico-chemical effects

Highly flammable liquid and vapour.

Most serious adverse effects on human health and the environment

May cause drowsiness or dizziness. Causes skin irritation. Causes serious eye damage.

2.2. Label elements

Danger

according to Commission Regulation (EU) 2020/878 as amended

# Rozpuszczalnik do lakieru PVB

	P280	Wear eye protection.			
	P302+P352	IF ON SKIN: Wash wi	th plenty of water.		
	P305+P351+P338		itiously with water for easy to do. Continue	several minutes. Remove contact rinsing.	
	P310	Immediately call a do	ctor.		
2.3.	Other hazards				

The mixture does not contain substances with endocrine disrupting properties in accordance with the criteria set out in Commission Delegated Regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605. Mixture does not contain any substance meet the criteria for PBT or vPvB in accordance with Annex XIII of Regulation (EC) No. 1907/2006 (REACH) as amended.

### SECTION 3: Composition/information on ingredients

### 3.2. Mixtures

### Chemical characterization

Mixture of substances and additives specified below.

Mixture contains these hazardous substances and substances with the highest permissible concentration in the working environment

Identification numbers	Substance name	Content in % weight	Classification according to Regulation (EC) No 1272/2008	Note
Index: 606-001-00-8 CAS: 67-64-1 EC: 200-662-2 Registration number: 01-2119471330-49- XXXX	acetone	≤60	Flam. Liq. 2, H225 Eye Irrit. 2, H319 STOT SE 3, H336 EUH066	1

## **SECTION 4: First aid measures**

### 4.1. Description of first aid measures

Take care of your own safety. If any health problems are manifested or if in doubt, inform a doctor and show him information from this safety data sheet. If unconscious, put the person in the stabilized (recovery) position on his side with his head slightly bent backwards and make sure that airways are free; never induce vomiting. If the person vomits by himself, make sure that the vomit is not inhaled. In life threatening conditions first of all provide resuscitation of the affected person and ensure medical assistance. Respiratory arrest - provide artificial respiration immediately. Cardiac arrest - provide indirect cardiac massage immediately.

### If inhaled

Terminate the exposure immediately; move the affected person to fresh air. Protect the person against growing cold. Provide medical treatment if irritation, dyspnoea or other symptoms persist.

### If on skin

Remove contaminated clothes. Wash the affected area with plenty of water, lukewarm if possible. Soap, soap solution or shampoo should be used if there is no skin injury. Provide medical treatment if skin irritation persists. Rinse skin with water/shower.

### If in eyes

Rinse eyes immediately with a flow of running water, open the eyelids (also using force if needed); remove contact lenses immediately if worn by the affected person. No neutralization should be performed in any case! Rinsing should be continued for 10-30 minutes from the inner to the outer eye corner to make sure that the other eye is not involved. Depending on the situation, call medical rescue service or ensure medical treatment as promptly as possible. Everyone must be referred for treatment even if affected only a little.

## If swallowed

DO NOT INDUCE VOMITING! Rinse out the mouth with water and provide 2-5 dL of water. Provide medical treatment if the person has any health problems.

# Most important symptoms and effects, both acute and delayed

20th February 2023

#### If inhaled

4.2.

Inhaling vapours can cause corrosion of the breathing system. May cause drowsiness or dizziness.

**If on skin** Causes skin irritation.

# If in eves

Causes serious eye damage.

# If swallowed

Corrosion of the digestion system can occur.

4.3. Indication of any immediate medical attention and special treatment needed

Symptomatic treatment.

# **SECTION 5: Firefighting measures**

## 5.1. Extinguishing media

# Suitable extinguishing media

Alcohol-resistant foam, carbon dioxide, powder, water spray jet, water mist.

Unsuitable extinguishing media

Water - full jet.

## 5.2. Special hazards arising from the substance or mixture

In the event of fire, carbon monoxide, carbon dioxide and other toxic gases may arise. Inhalation of hazardous degradation (pyrolysis) products may cause serious health damage.

# 5.3. Advice for firefighters

Use a self-contained breathing apparatus and full-body protective clothing. Self-Contained Breathing Apparatus (SCBA) with a chemical protection suit only where personal (close) contact is likely. Closed containers with the product near the fire should be cooled with water. Do not allow run-off of contaminated fire extinguishing material to enter drains or surface and ground water.

### **SECTION 6: Accidental release measures**

### 6.1. Personal precautions, protective equipment and emergency procedures

Provide sufficient ventilation. Highly flammable liquid and vapour. Remove all ignition sources. Use personal protective equipment for work. Follow the instructions in the Sections 7 and 8. Do not inhale aerosols. Prevent contact with skin and eyes.

according to Commission Regulation (EU) 2020/878 as amended

# Rozpuszczalnik do lakieru PVB

Creation date Revision date 20th February 2023

Version

4.0

#### 6.2. Environmental precautions

Prevent contamination of the soil and entering surface or ground water.

#### 6.3. Methods and material for containment and cleaning up

Spilled product should be covered with suitable (non-flammable) absorbing material (sand, diatomaceous earth, earth and other suitable absorption materials); to be contained in well closed containers and removed as per the Section 13. In the event of leakage of the substantial amount of the product, inform fire brigade and other competent bodies. After removal of the product, wash the contaminated site with plenty of water. Do not use solvents.

### 6.4. Reference to other sections

See the Section 7, 8 and 13.

### SECTION 7: Handling and storage

## 7.1. Precautions for safe handling

Prevent formation of gases and vapours in flammable or explosive concentrations and concentrations exceeding the occupational exposure limits. The product should be used only in the areas where it is not in contact with open fire and other ignition sources. Use non-sparking tools. Use of antistatic clothes and footwear is recommended. Do not inhale aerosols. Prevent contact with skin and eyes. No smoking. Use only non-sparking tools. Wash hands and exposed parts of the body thoroughly after handling. Use only outdoors or in a well-ventilated area. Use personal protective equipment as per Section 8. Observe valid legal regulations on safety and health protection. Ground and bond container and receiving equipment. Use explosion-proof electrical/ventilating/lighting equipment. Take precautionary measures against static discharge.

### 7.2. Conditions for safe storage, including any incompatibilities

Store in tightly closed containers in cold, dry and well ventilated areas designated for this purpose. Do not expose to sunlight. Store locked up. Keep container tightly closed. Keep cool.

Content	Packaging type	Material of package
500 ml	bottle	HDPE

### The specific requirements or rules relating to the substance/mixture

Solvent vapours are heavier than air and accumulate especially near the floor where they may form an explosive mixture with the air.

# 7.3. Specific end use(s)

# not available

# SECTION 8: Exposure controls/personal protection

#### 8.1. Control parameters

The mixture contains substances for which occupational exposure limits are set.

## 8.2. Exposure controls

Follow the usual measures intended for health protection at work and especially for good ventilation.

## Eye/face protection

Protective goggles or face shield (based on the nature of the work performed).

20th February 2023

## Skin protection

Hand protection: Protective gloves resistant to the product. When choosing appropriate thickness, material and permeability of the gloves, observe recommendations of their particular manufacturer. Observe other recommendations of the manufacturer. Other protection: protective workwear. Contaminated skin should be washed thoroughly.

### **Respiratory protection**

Halfmask with a filter against organic vapours or a self-contained breathing apparatus as appropriate if exposure limit values of substances are exceeded or in a poorly ventilated environment.

# Thermal hazard

Not available.

### **Environmental exposure controls**

Observe usual measures for protection of the environment, see Section 6.2.

### **SECTION 9: Physical and chemical properties**

## 9.1. Information on basic physical and chemical properties

Physical state	liquid
Colour	colourless
Odour	data not available
Melting point/freezing point	data not available
Boiling point or initial boiling point and boiling range	data not available
Flammability	Highly flammable liquid and vapour.
Lower and upper explosion limit	data not available
Flash point	<23 °C
Auto-ignition temperature	data not available
Decomposition temperature	data not available
рН	non-polar/aprotic
Kinematic viscosity	data not available
Solubility in water	data not available
Solubility in fats	data not available
Partition coefficient n-octanol/water (log value)	data not available
Vapour pressure	data not available
Density and/or relative density	data not available
Relative vapour density	data not available
Particle characteristics	data not available
Other information	
Evaporation rate	data not available

### **SECTION 10: Stability and reactivity**

10.1.	Reactivity
	not available
10.2.	Chemical stability
	The product is stable under normal conditions.
10.3.	Possibility of hazardous reactions
	Unknown.
10.4.	Conditions to avoid
	The product is stable and no degradation occurs under normal use.
10.5.	Incompatible materials
	Protect against strong acids, bases and oxidizing agents.
10.6.	Hazardous decomposition products
	Not developed under normal uses. Dangerous outcomes such as carbon monoxide and carbon dioxide are formed at high temperature and in fire.

# **SECTION 11: Toxicological information**

#### 11.1. Information on hazard classes as defined in Regulation (EC) No 1272/2008

No toxicological data is available for the mixture.

## Acute toxicity

Based on available data the classification criteria are not met.

# acetone

Route of exposure	Parameter	Value	Exposure time	Species	Sex
Oral	LD50	5800 mg/kg		Rat (Rattus norvegicus)	
Inhalation (vapor)	LC50	76000 mg/m <sup>3</sup>	4 hours	Rat (Rattus norvegicus)	
Dermal	LD 50	7400 mg/kg		Rabbit	
Dermal	LD50	7400 mg/kg		Guinea-pig (Cavia aperea f. porcellus)	

### butan-1-ol

Route of exposure	Parameter	Value	Exposure time	Species	Sex
Oral	LD50	2292 mg/kg		Rat (Rattus norvegicus)	
Dermal	LD50	3430 mg/kg		Rabbit	
Inhalation	LC50	17.76 mg/l	4 hours	Rat (Rattus norvegicus)	

## isopropanol

Route of exposure	Parameter	Value	Exposure time	Species	Sex
Inhalation	LC50	>5 mg/l	4 hours	Rat	
Oral	LD 50	>2000 mg/kg		Rat	
Skin	LD 50	>2000 mg/kg		Rabbit	

#### Skin corrosion/irritation

Causes skin irritation.

### Serious eye damage/irritation

Causes serious eye damage.

## acetone

Route of exposure	Result	Method	Exposure time	Species
Eye		OECD 405		

### Respiratory or skin sensitisation

Based on available data the classification criteria are not met.

### Germ cell mutagenicity

Based on available data the classification criteria are not met.

#### Carcinogenicity

Based on available data the classification criteria are not met.

#### **Reproductive toxicity**

Based on available data the classification criteria are not met.

#### Toxicity for specific target organ - single exposure

May cause drowsiness or dizziness.

#### Toxicity for specific target organ - repeated exposure

Based on available data the classification criteria are not met.

#### Aspiration hazard

Inhalation of solvent vapors above values exceeding exposure limits for working environment may result in acute inhalation poisoning, depending on the level of concentration and exposure time. Based on available data the classification criteria are not met.

Product does not contain any substance meeting the criteria for PBT or vPvB in accordance with the Annex XIII of Regulation (EC) No 1907/2006 (REACH) as amended.

### 12.6. Endocrine disrupting properties

20th February 2023

The mixture does not contain substances with endocrine disrupting properties in accordance with the criteria set out in Commission Delegated Regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605.

# 12.7. Other adverse effects

Not available.

# SECTION 13: Disposal considerations

## 13.1. Waste treatment methods

Hazard of environmental contamination; dispose of the waste in accordance with the local and/or national regulations. Proceed in accordance with valid regulations on waste disposal. Any unused product and contaminated packaging should be put in labelled containers for waste collection and submitted for disposal to a person authorised for waste removal (a specialized company) that is entitled for such activity. Do not empty unused product in drainage systems. The product must not be disposed of with municipal waste. Empty containers may be used at waste incinerators to produce energy or deposited in a dump with appropriate classification. Perfectly cleaned containers can be submitted for recycling.

## Waste management legislation

Directive 2008/98/EC of the European Parliament and of the Council of 19 November 2008 on waste, as amended. Decision 2000/532/EC establishing a list of wastes, as amended.

### Information about data sources used to compile the Safety Data Sheet

REGULATION (EC) No. 1907/2006 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL (REACH) as amended. REGULATION (EC) No. 1272/2008 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL as amended. Data from the manufacturer of the substance / mixture, if available - information from registration dossiers.

## The changes (which information has been added, deleted or modified)

The version 4.0 replaces the SDS version from 21 December 2022. Changes were made in sections 1, 2, 12, 15 and 16.

## Statement

The safety data sheet provides information aimed at ensuring safety and health protection at work and environmental protection. The provided information corresponds to the current status of knowledge and experience and complies with valid legal regulations. The information should not be understood as guaranteeing the suitability and usability of the product for a particular application.
