

## Silicon-free distributor for the forms

Product used in plastic processing. Does not contain silicone. May be used in the manufacture of products requiring further surface treatment. The formulation may be used universally and is suitable for most plastic materials. Can be used as a lubricant or an antiadhesive agent. Does not build up in the mould and does not lead to the formation of deposits, allowing good surface quality by reducing defect count and improving performance. Allows for subsequent painting or bonding without degreasing.

Physicochemical properties	
State of matter	gas
Color	colorless
Odor	characteristic smell
Relative density at 20 °C	-0,91 g/cm <sup>3</sup>
Operating temperature	up to 170 °C
Solubility in water	not soluble

### Application:

- as a lubricant or an antiadhesive agent,
- extrusion of plastic materials,
- vacuum-forming of plastics,
- injection moulding of plastic materials,
- manufacture of plastic laminates.

### Packagings:

Volume	Type of packaging	Collective packaging	Item Code
400 ml	aerosol	4/12	ART.AGT-228

### Warehousing:

Store in sealed containers in dry and well ventilated areas away from sources of heat and ignition and direct sunlight. Do not expose to temperatures exceeding 50 °C/122 °F.
